

EMIL LAWRENCE VILLANUEVA PEQUIERDA

IT Support | Web Developer | AI expert |

emilpequierda@gmail.com | +63-929-357-5217 | [emilportfolio.vercel.app](#) | Puerto Princesa City, Philippines

PROFESSIONAL SUMMARY

Information Systems graduate and active IT professional with a strong track record of managing full-scale infrastructure and delivering custom software solutions within hospital and medical center environments. Experienced in administering enterprise healthcare IT setups, including PC domain configurations, Active Directory, and secure network deployment. Proven expertise as a networking troubleshooter, skilled in managing LAN infrastructure and complex PABX telephone/cable system setups, alongside physical security systems like CCTV. Highly capable database reporter specializing in complex RDL reports for BizBox systems. As an agile Web Developer, leverages AI-assisted development methodologies for rapid system delivery, combining fast deployment with rigorous Quality Assurance (QA) testing to ensure zero-bug, deployment-ready applications that optimize clinical and business workflows.

AWARDS & RECOGNITION

- Innovation Project of the Year | *ACE Medical Center Palawan*
- Awarded for the conceptualization, development, and deployment of the Hospital Incident Command System, significantly improving emergency response coordination and operational resilience.

CERTIFICATIONS & CONTINUING EDUCATION

- Google Cybersecurity Professional Certificate (Coursera 8 courses)
- Google IT Support Professional Certificate (Coursera 8 courses)
- Self-Study: Advanced Network Security & Infrastructure (Preparing for CompTIA Security+ Certification)

TECHNICAL SKILLS

- **IT Support & Systems Administration:** Windows Server, Active Directory, PC Domain Setup, Hardware/Software Troubleshooting, Windows OS Support, Printer/Peripheral Deployment.
- **Networking & Infrastructure:** LAN/Wi-Fi Configuration, Network Troubleshooting, PABX Telephone System Setup, Structured Cabling, Network Security Fundamentals, Vulnerability Assessment.
- **Software & Web Development:** Full-Stack Web Development, AI-Assisted Programming, Quality Assurance (QA) & Pre-deployment Testing, UI/UX Design, Cloudflare Tunneling.
- **Databases & Enterprise Tools:** BizBox ERP Management, RDL Report Engineering (SSRS), SQL Server / MySQL Database Administration

PROJECT EXPERIENCE

- **Hospital Incident Command System (Award-Winning Project)**
Developed an emergency response management system designed to streamline communication, resource allocation, and real-time data tracking for hospital command centers during critical incidents.
- **Warehouse Management System (Deployed at PALMICO Corp)**
Designed and deployed a full-scale warehouse management application featuring area-specific reporting and monthly financial income tracking.
- **Dental Management System (Deployed & Active since 2025)**
Developed a comprehensive patient record platform featuring digital dental charts, treatment trackers, and secure patient profiling.
Implemented local-to-online access synchronization utilizing secure Cloudflare tunneling for hybrid offline/online availability.
- **BizBox System Enhancements & Tools**
Engineered automated, one-click pricing generation scripts and algorithmic inventory reorganization by department inside BizBox. Designed and maintained custom SQL-driven RDL reports tailored to specific department operational requirements.

WORK EXPERIENCE

- **IT Operational Staff | ACE Medical Center Palawan (2022 – Present)**
Administer hospital enterprise IT infrastructure, including active directory management, server configurations, and endpoint PC domain maintenance.
Manage, troubleshoot, and optimize the hospital's BizBox ERP system and database reporting engine.
Maintain physical infrastructure, including complex LAN networks, PABX telephone routing, structured cabling, and the hospital's CCTV surveillance matrix.
- **Computer Operator | Provincial Capitol Palawan (2021 – 2022)**
Handled day-to-day hardware support, operating system maintenance, and network connectivity troubleshooting across various provincial government offices.
Managed secure data entry, digital profiling, and technical reporting for municipal records.
- **IT Intern (OJT) | Matalam Police Station – Investigation Department (3 Weeks)**
Assisted the investigation division with digital document processing, secure database data entry, and basic station hardware maintenance.

EDUCATION

- Bachelor of Science in Information Systems Southern Baptist College – M’lang, North Cotabato (2015 – 2020)
